Environmental Protection Agency,

I recommend you adapt Alternative G with enhancements to provide Portland residents the clean river that we deserve. As there is not evidence to show that Monitored Natural Recovery is effective the plan should minimize its use, monitor its effectiveness, and include funds for contingencies if it is not effective.

As the most vulnerable members of our community eat fish from the Willamette, it is also important for the plan to provide a firm date when the Fish Consumption Advisory will be lifted and hold those liable responsible for hitting that date, with risk of meaningful fines. Fish should be regularly tested for contaminants to ensure that the Advisory will be lifted on time.

Please take advantage of this opportunity to ensure that Portland has a clean river that benefits all members of our community.

Warm regards,

(b) (6)
